

Coordination Partner for Industrial Teams & Project Support

We connect industrial clients with a network of established European contractors and certified technical teams for project execution in complex industrial environments.

- Direct access to a network of over 300+ qualified industrial professionals.
- Rapid mobilization and flexible scaling within the Netherlands, Belgium, and Germany.
- Immediately available: Both individual specialists and complete, multidisciplinary teams.

2026

Proven industrial execution capabilities through a reliable European partner network.

CAPACITY & TECHNICAL EXPERTISE

From individual specialists to complete project teams: we deliver the execution power your project requires.

01 Individual Specialists

Certified professionals for the targeted reinforcement of your own teams:

- **Welders:** ISO 9606-certified, with extensive experience in carbon steel, stainless steel, P91, and high-grade high-pressure applications.
- **Pipefitters & Mechanical Fitters:** Specialists in mechanical installation, assembly, and piping.
- **Industrial Electricians:** Qualified for low and high voltage, including cabling and panel building.

02 Complete Teams & Crews

Ready-to-deploy teams that can start working independently on-site immediately:

- **Piping & welding teams**
- **Mechanical installation crews**
- **Shutdown & Turnaround teams**

03 Project Support & Site Management

The coordination and quality assurance layer to ensure your project runs safely and in full compliance:

- **IWT-Certified Welding Coordinators:** Technical guidance and assurance of project integrity.
- **QA/QC Inspectors & NDT Coordinators:** Support with quality documentation and NDT inspections.
- **HSE Professionals & Site Supervisors:** Supervision of safety and operational progress.
- **Prefabrication Support:** Access to partner workshops for prefabricated piping.

OUR 6-STEP COORDINATION MODEL

Maximum risk mitigation through a transparent, structured, and safe delivery process.

01

TECHNICAL ANALYSIS

Thorough analysis of your specific project requirements and the necessary compliance.

02

COMPLIANCE SCREENING

Strict verification of qualifications, certificates, and applicable legislation.

03

PARTNER SELECTION

Matching the best-fit party or parties from our network of European contractors.

04

DOCUMENTATION

Comprehensive preparation and verification of all required documents and schedules.

05

MOBILIZATION & DEPLOYMENT

Rapid deployment on-site.

06

SUPERVISION & MONITORING

Continuous quality oversight and coordination throughout the entire project.

Safety, Quality & Compliance

- **A1 Documentation:** Fully and correctly processed through our established partner companies.
- **VCA / SCC Compliance:** Our professionals are certified to operate in high-risk environments.
- **Insurance & Liability:** Comprehensively covered through the executing partner enterprises.
- **Experience:** Our management team and partner network bring over 17 years of experience in European industrial projects.

EXPERTISE IN HIGH-RISK & COMPLEX ENVIRONMENTS

Why industrial market leaders trust our network.

Core Sectors

We coordinate capacity for maintenance, modifications (brownfield), new builds (greenfield), and critical outages within:

- Oil & Gas / Refineries
- Petrochemical & Chemical Plants
- Pharmaceutical Facilities
- Energy Sector & Power Plants
- Shipbuilding & Marine
- Industrial Shutdowns & Turnarounds

Key Benefits:

- **A Single Point of Contact:** Full access to a vast network of established industrial contractors through one central gateway.
- **Rapid Scalability:** Direct capacity to quickly scale up or down based on your project requirements, without long-term commitments.
- **Risk Mitigation:** We act as the coordination layer that ensures the right match, correct documentation (compliance), and the highest quality.

Let's discuss your upcoming project requirements or shutdown plans.
